Neglasari, Tangerang City, Banten, Indonesia

Summary

I am a Junior Backend Developer. I specialize in exploring and implementing new technologies, and creating new features based on product needs.

I am also responsible for fixing bugs in software and performing software development.

Skills

Skillset – Web Development, Backend Developer

Toolset – C#, ASP.Net, Web API, PostgreSQL, MSSQL, Visual Studio

Working Experience

Backend Developer • PT Electrindo Inti Dinamika June 2023 - Present

As a Backend Developer, I was involved in several projects at Electrindo Inti Dinamika, including Smart Data Digitalization of AHM Plant 3 (RESTful API C#), and Smart Data Digitalization of AHM Plant 6 (RESTful API C#).

In this project I developed automation products for monitoring systems, internet of things from PLC, and maintenance schedule for engineers.

Even in this project, I was praised for my development in this project.

I have knowledge and experience in using PostgreSQL, MQTTs Explorer, Onion Architecture, C#, Entity Framework Core, Dapper ORM, SignalR.

Education

SMK PANCAKARYA

2020 - 2023

Teknik Komputer & Jaringan

Achievement

2nd Student Competence
